

Welcome to the Ilies Lab in the [Department of Pharmaceutical Sciences](#) in the [School of Pharmacy](#) at Temple University! Our lab is located on the fifth floor of the Pharmacy building, which is situated in the [Health Science Campus of TU](#), in close proximity to TU Hospital, TU School of Medicine and TU School of Dentistry. Temple University is a major U.S. university, with over 40000 students and is also a major provider of professional education in the area and nationwide. [Temple University](#) is primarily located in the vibrant Philadelphia, a city intimately linked with US fight for independence, race and gender equality and equal opportunity. It was ranked among the most diverse US universities, and has a strong international presence, with campuses in Rome, Italy and in Tokyo, Japan.

Our lab is active in several scientific areas and our work is highly interdisciplinary and very collaborative in nature. Graduate students interested in pharmaceutical sciences with a focus on medicinal chemistry and drug discovery and pharmaceuticals are encouraged to apply to our [TUSP graduate program](#). Undergraduate students are encouraged to contact Dr. Ilies directly in order to explore different research programs and financial support available.
