PGY2 pharmacy residency programs build on Doctor of Pharmacy (PharmD) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in specialized areas of practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care or other advanced practice settings. Residents who successfully complete an accredited PGY2 pharmacy residency are prepared for advanced patient care, academic, or other specialized positions, along with board certification.

Explore the Temple University School of Pharmacy PGY2 residencies in:
- Ambulatory Care
- Critical Care
- Infectious Diseases
- Internal Medicine

Application Requirements
- Doctor of Pharmacy degree from an accredited institution
- Completion of an ASHP-accredited PGY-1 Pharmacy Residency or equivalent experience
- Participation in ASHP/NMS Matching Program
- Curriculum vitae
- Letter of intent
- Transcript from pharmacy school
- Three letters of recommendation
- Applications sent via PhORCAS

Residency Completion Requirements
- Complete research project and written manuscript
- Committee participation
- Teaching certificate course (if not already completed in PGY1 program)
- Didactic and Clinical teaching
Facilities
The primary clinical teaching site for the School of Pharmacy and the Lewis Katz School of Medicine, Temple University Hospital is a 721-bed tertiary care university hospital with an outpatient pharmacy. The hospitals and school are located on the Health Sciences Center Campus of Temple University in Philadelphia along with Ambulatory Care clinics and within the hospital is the Temple Outpatient Pharmacy.

The affiliation between the school and hospital allows residents to participate in educational experiences and to work with PharmD students during their clinical experiences, didactic coursework, and small group classes. Administration and faculty members mentor residents in academia upon request.
AMBULATORY CARE

The Temple University School of Pharmacy Ambulatory Care residency is a one (1) year PGY-2 residency, which provides a comprehensive experience in a variety of ambulatory care settings with an emphasis in service and teaching. The program enables residents to confidently assume a clinical role and to become efficient educators for patients, healthcare professionals, and students. Residents work with several highly-qualified Temple University School of Pharmacy faculty members at their various practice sites. On many clinical rotations, residents operate under collaborative practice agreements to manage different disease states and participate in all outpatient pharmacy services, including, but not limited to, optimization of drug therapy, preventative medicine services, managing medication-related issues, and serving as a drug information resource for other healthcare professionals.

Required Rotations

- Internal Medicine
- Anticoagulation
- Abdominal/Renal Transplant
- Hepatitis C
- HIV/Infectious Disease

Elective rotations are available in other specialties.

Teaching requirement

- Didactic teaching opportunities
- Instruct a Pharmacotherapy recitation section
- Independently precept an IPPE rotation
- Precept APPE students

“This residency year has taught me how to be adaptable & compassionate in both my personal and professional lives. I have learned how to be a better teacher, preceptor, and pharmacist and I will be forever grateful for my experience as a resident this year.”
The Temple University School of Pharmacy and Temple University Health System jointly offer a PGY2 Pharmacy Residency in Critical Care. The program emphasizes the role of the pharmacist as an educator. Residents have multiple opportunities to teach in large and small classroom settings and to precept experiential learning. The rotations and longitudinal projects are designed to facilitate the development of practice management skills, optimize healthcare using evidence-based approaches, and contribute to pharmacy student education. Graduates of the program will be prepared to practice as a well-rounded clinical specialist or clinical pharmacy faculty member.

Required Rotations (all 6 weeks)
- Emergency Medicine
- Orientation (5 weeks)
- Medical Respiratory Intensive Care Unit I
- Medical Respiratory Intensive Care Unit II
- Surgical/Trauma Intensive Care
- Cardiothoracic Intensive Care

Elective Rotations (based on interest & availability) (Choose 3)
- Infectious Disease
- Neurology Intensive Care
- Can repeat any required rotations

Provide evidence-based pharmacy services to complex critically ill patients
The Temple University School of Pharmacy Infectious Disease residency is structured into rotations that sync with the schedule of the advanced pharmacy practice experiences (APPEs) of the fourth-year Doctor of Pharmacy students and the pharmacy practice residents. The program requires a mix of required and elective experiences in addition to a required orientation and a microbiology lab experience in July. During July and August, residents participate in a “lunch and learn” clinical orientation program with the Infectious Diseases Fellows, where faculty from the School of Pharmacy and Lewis Katz School of Medicine discuss topics that they will encounter throughout their training programs.

**Required Rotations**  
(6 weeks unless otherwise indicated)

- Infectious Diseases Consult Service
- Antimicrobial Stewardship Program
- Transplant Infectious Diseases
- Pediatric Infectious Diseases (at St. Christopher's Hospital for Children)
- HIV Clinic (weekly, longitudinal, partial-year)
- Medical Respiratory Intensive Care Unit or Burn Intensive Care Unit
- Teaching (on the Infectious Disease Consult Service)
- Microbiology Laboratory (2 weeks)

**Elective Rotations**

- Stem Cell Transplant (at Jeanes Hospital, recommended)
- Surgical Intensive Care Unit
- Abdominal Transplant Service
- Lung Transplant Service
- Internal Medicine
- International Health in Central America (as available)
I learned so much over the year not only in clinical pharmacy, but also how to be an effective presenter and preceptor - all skills that are essential in becoming a successful ambulatory care pharmacist!
The Temple University School of Pharmacy PGY-2 Residency in Internal Medicine provides residents with an advanced education that fosters pharmacy leadership and excellence in patient care. The residency is designed to train pharmacists to provide individualized care to adult medicine patients in the inpatient and ambulatory care settings. The rotations are designed to facilitate the development of practice management skills, optimize healthcare using evidenced-based approaches, promote advocacy and service to our patients and community, and contribute to pharmacy student education. The program emphasizes the role of the pharmacist as an educator. Residents have multiple opportunities to teach in large and small classroom settings and to precept experiential learning.

**Required Rotations (6 weeks unless otherwise indicated)**
- Orientation (5-weeks)
- Internal Medicine I
- Internal Medicine II (advanced therapeutics and transitions of care)
- Internal Medicine III (clinical site management and precepting)
- Ambulatory care
- Critical Care

**Elective Rotation (residents select 3)**
- Infectious Disease
- Geriatrics
- HIV clinic
- Other electives based on resident interest and preceptor availability

**Teaching requirement**
- Serve as a co-instructor in P&T recitation (Fall semester)
- Serve as a primary instructor in P&T recitation (Spring semester)
- Serve as an IPPE preceptor

---

My residency experiences at TUSP have given me the opportunity to grow both personally and professionally. I am so grateful for all of my preceptors who have guided me along the way!
