

A PharmD degree opens up **A WORLD OF OPPORTUNITIES** to work in patient care, research, business, advocacy, and governance. PharmDs hold roles in:

- Hospitals and health systems
- Community pharmacies
- Pharmaceutical companies
- Research organizations
- Schools of pharmacy
- Health insurance companies
- Government regulatory agencies (e.g. United States FDA)
- Medical mission organizations

TUSP HAS UNIQUE PATHWAYS TO ENHANCE YOUR ACADEMIC JOURNEY

- Specialty concentration tracks in Clinical Trials, Drug Safety, or Advanced Clinical Practice or Community Practice
- Dual Master of Science Degree in Global Clinical Pharmacovigilance Regulations (GCPR)
- Dual PharmD/MBA Degree via our partnership with Temple's Fox School of Business

REAL-WORLD LEARNING

Students have the opportunity to engage in programs that support our international partners by traveling to their healthcare facilities and joining medical teams. Working alongside interprofessional global health teams and local providers, students contribute to the enhancement of existing healthcare systems. They provide needs-based primary medical care with an emphasis on patient education, capacity-building training, and community health education.

NEXT STEPS

We welcome prospective students from all academic backgrounds.

Many students complete an undergraduate degree at Temple University's main campus or another 4-year institution prior to pursuing a PharmD. Others complete our program's prerequisites at an accredited college or university, so they may enter the program sooner.

PARTNERSHIPS

Agreements with the following local institutions provide a seamless transition into our Doctor of Pharmacy program.

- Commonwealth University of Pennsylvania
- Bucks County Community College
- Camden County College
- Chestnut Hill College
- Eastern University
- Montgomery County Community College
- Northampton Community College
